The Pulsar-23 is an amazing semi-modular analog drum machine and synth made by Soma Laboratories. They describe it as organismic! It's a crazy beast that rewards experimentation, and I have captured some of its unique and unruly sounds for this pack.

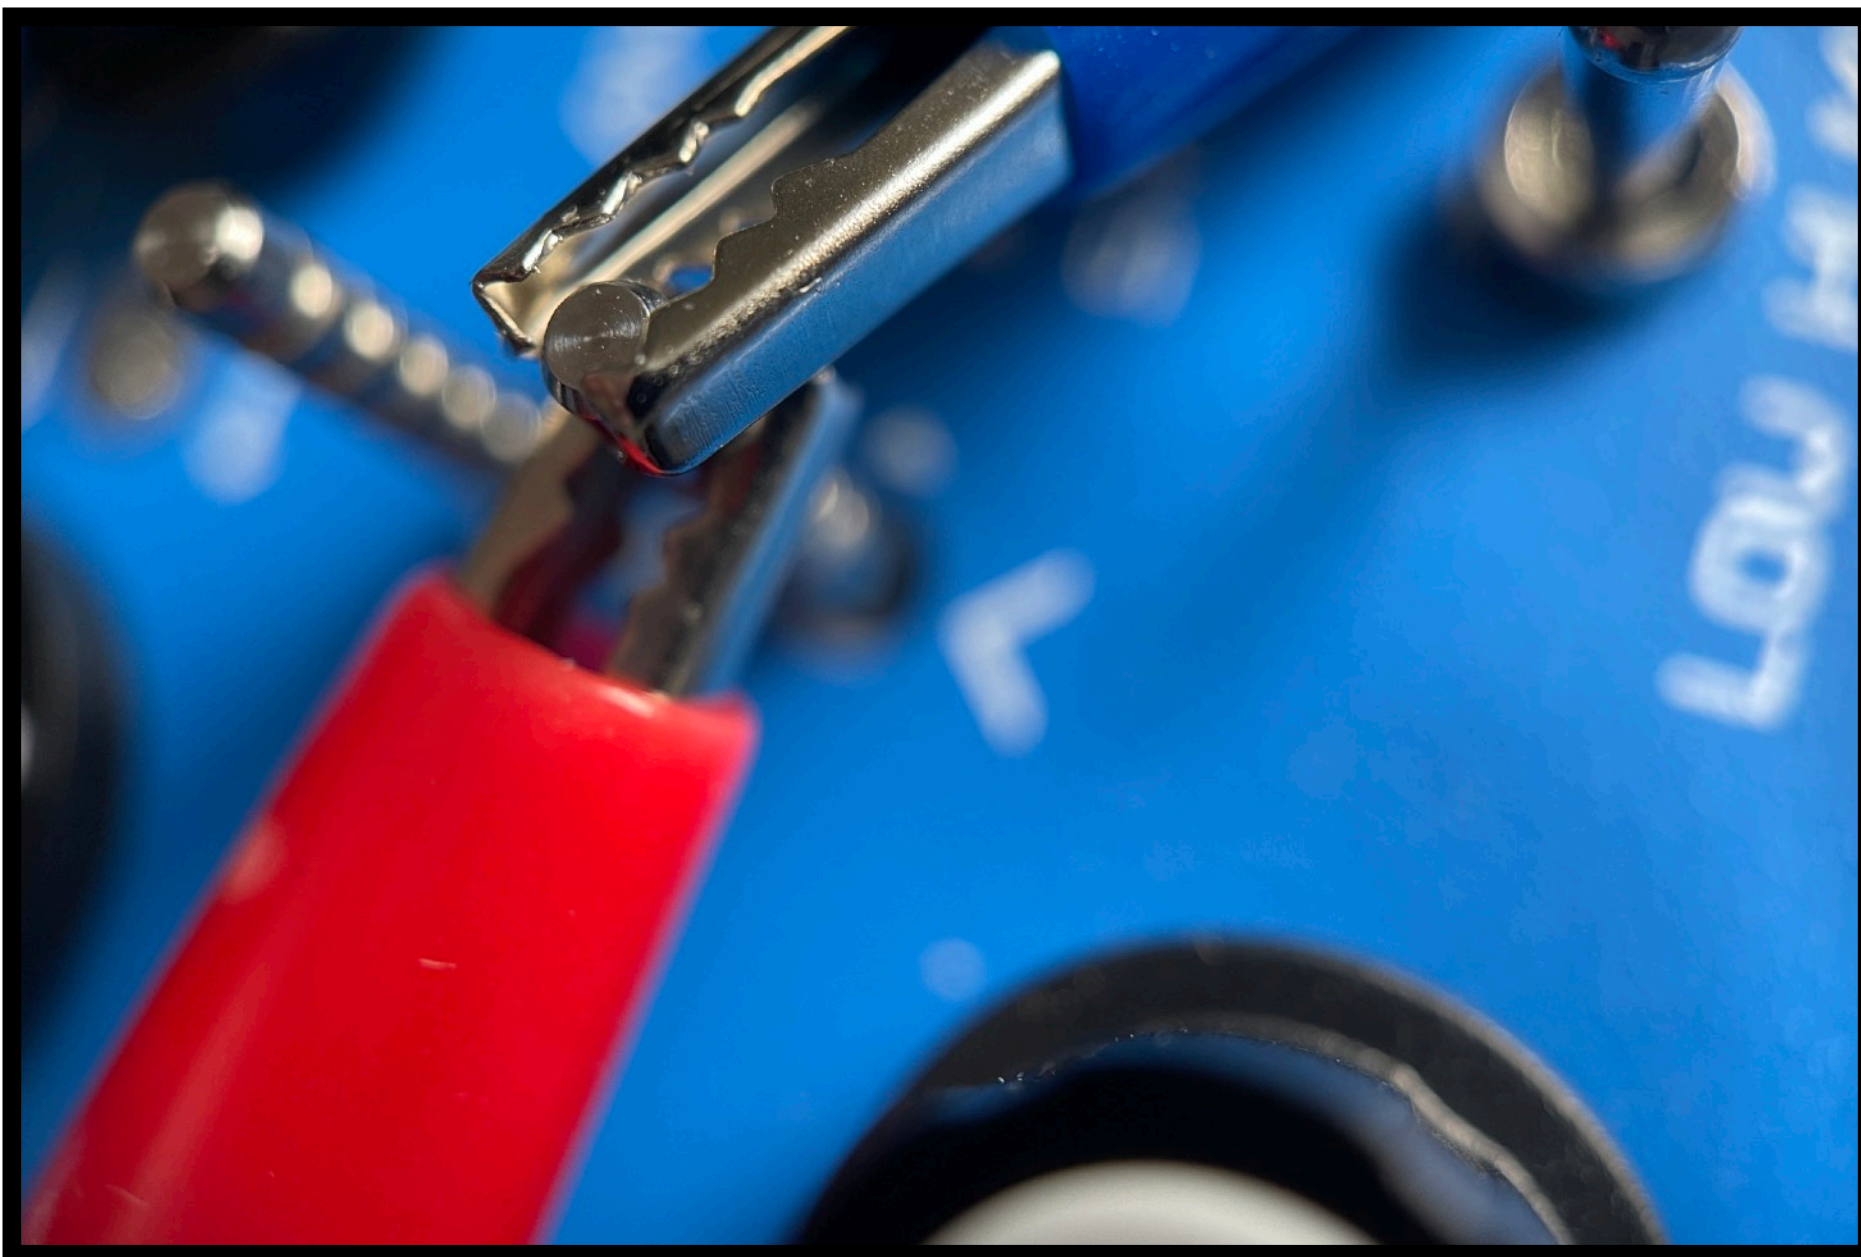

These samples were recorded in the Goldbaby studio utilising a selection of tasty high-end studio hardware. I also made a few samples using some crazy guitar pedals!

Pulse is brimming with inspiration with plenty of punchy drums, crazy FX, and unique synths.
